

Capstone Project Rubric: Statistical Analysis of the Doctrine and Covenants

Overview

This project evaluates a data-driven analysis of the Doctrine and Covenants, combining statistical methods with doctrinal interpretation and personal reflection. The goal is to assess both technical quality and meaningful engagement with course themes.

Grading Criteria (100 points total)

1. Depth of Doctrinal Insight and Personal Learning (30 points)

Level	Description	Points
Excellent	Demonstrates clear, thoughtful, and specific insights about revelation, faith, and doctrine. Interpretation is well-connected to the data and includes meaningful personal reflection.	27–30
Proficient	Shows solid understanding with reasonable connections between analysis and doctrine. Reflection is present but may be somewhat general.	23–26
Developing	Limited or surface-level interpretation. Weak connection between analysis and doctrinal meaning. Minimal personal reflection.	18–22
Incomplete	Little to no interpretation or reflection.	0–17

2. Quality of Data Design and Statistical Reasoning (25 points)

Level	Description	Points
Excellent	Dataset is well-structured, clean, and appropriate for analysis. Methods are correct, clearly explained, and demonstrate strong statistical thinking.	23–25

Proficient	Dataset and methods are mostly correct with minor issues. Reasoning is generally sound.	20–22
Developing	Some flaws in data structure or analysis. Limited explanation of methods.	16–19
Incomplete	Major issues in dataset or incorrect/missing analysis.	0–15

3. Effectiveness and Clarity of Visualizations (20 points)

Level	Description	Points
Excellent	Visualizations are clear, well-labeled, and directly support insights. Graphs are easy to interpret and thoughtfully selected.	18–20
Proficient	Visualizations are mostly clear and relevant, with minor labeling or design issues.	15–17
Developing	Visualizations are present but unclear, poorly labeled, or weakly connected to analysis.	12–14
Incomplete	Missing or ineffective visualizations.	0–11

4. Integration of Academic Skills with Spiritual Application (15 points)

Level	Description	Points
Excellent	Strong integration of statistical analysis with spiritual and doctrinal application. Clearly demonstrates how academic skills enhance understanding of scripture.	14–15
Proficient	Good connection between analysis and spiritual application, though not fully developed.	12–13
Developing	Limited or unclear integration between academic work and spiritual insights.	9–11
Incomplete	No meaningful integration.	0–8

5. Organization, Effort, and Overall Presentation (10 points)

Level	Description	Points
Excellent	Report is well-organized, clearly written, and professionally presented. Demonstrates strong effort and attention to detail.	9–10
Proficient	Organization and clarity are good with minor issues.	7–8
Developing	Organization is inconsistent or difficult to follow.	5–6
Incomplete	Poor organization or incomplete submission.	0–4

Total: 100 points
